# #1\_3. MAIN STRUCTURE

section별로 컴포넌트를 분리하여 코드의 가독성을 높이고 유지보수에 유리  
스크롤애니메이션을 처리하기 위해 Main.js 컴포넌트화

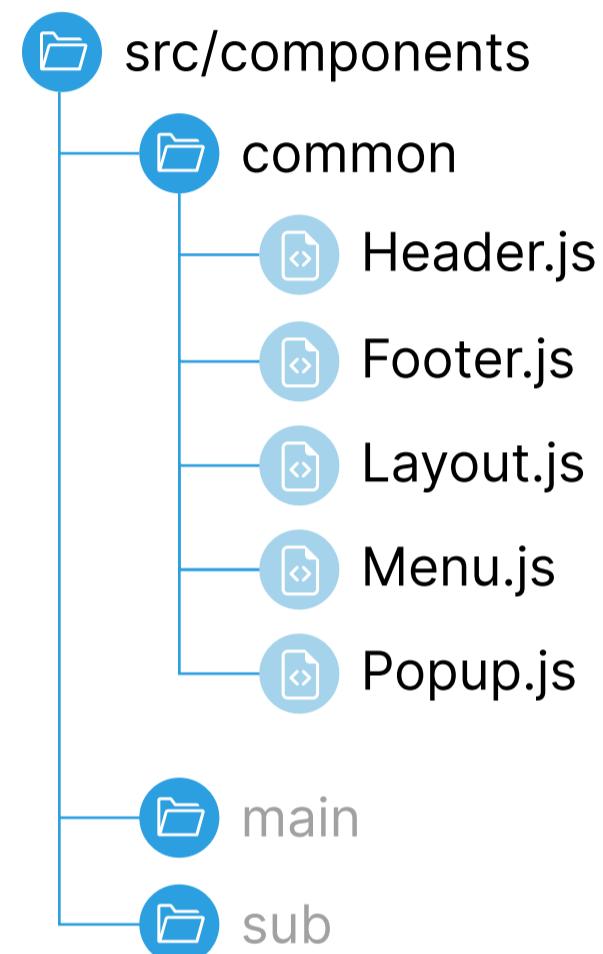

The screenshot shows a website layout with a large banner at the top featuring a modern building and the word "MASSIVE". Below the banner, there are two columns of content. The left column has a "COMMUNITY" section with a small image of a white building and some text. The right column has sections for "How streams become stories", "Where does it come from?", and "Vestibulum id ante varius, fermentum leo non, luct...". At the bottom, there is a "Our Videos" section with a thumbnail image of a building.

Below the banner, there are several sections: "COMMUNITY" (with a small image of a white building), "How streams become stories" (with a detailed text block), "Where does it come from?" (with a detailed text block), "Vestibulum id ante varius, fermentum leo non, luct..." (with a detailed text block), "Our Videos" (with a thumbnail image of a building), and "Ours story" (with a detailed text block). At the bottom, there is a "Our Team" section showing six profile pictures of people.

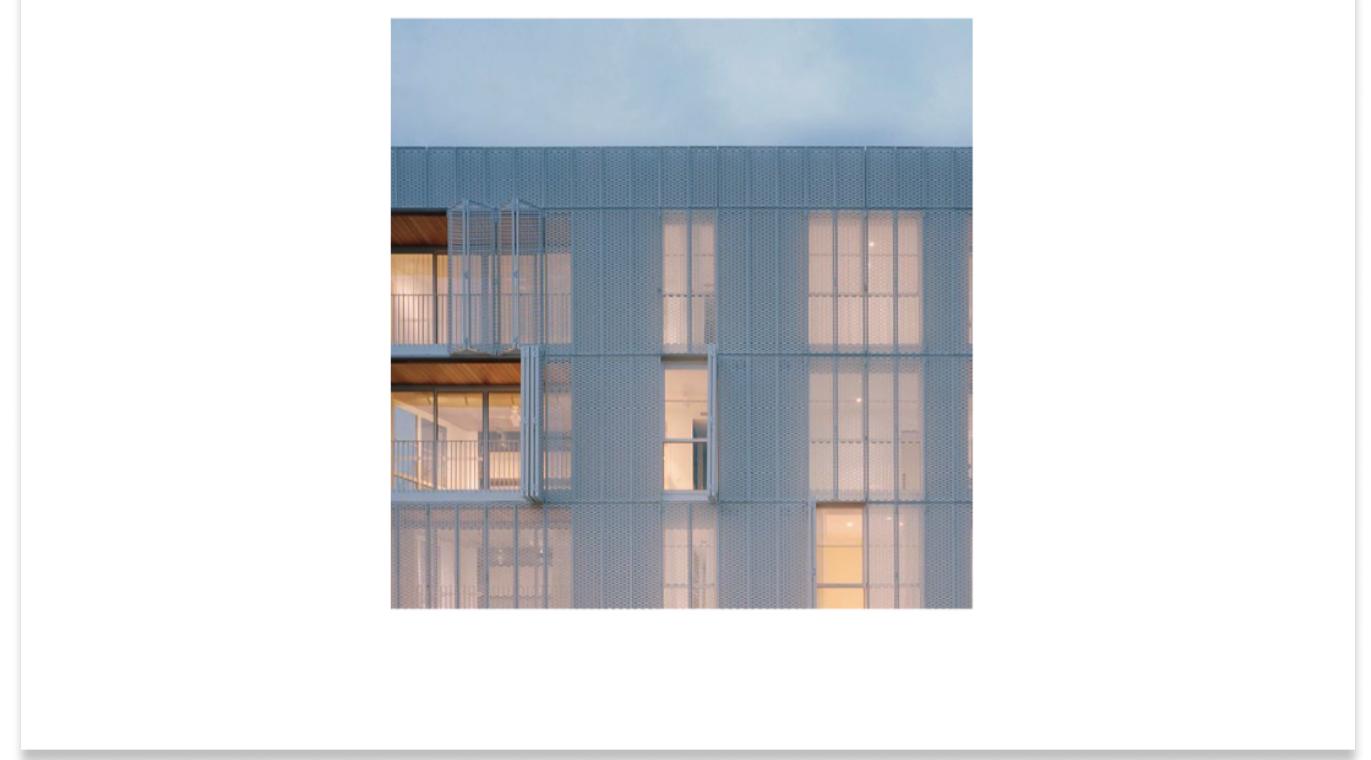

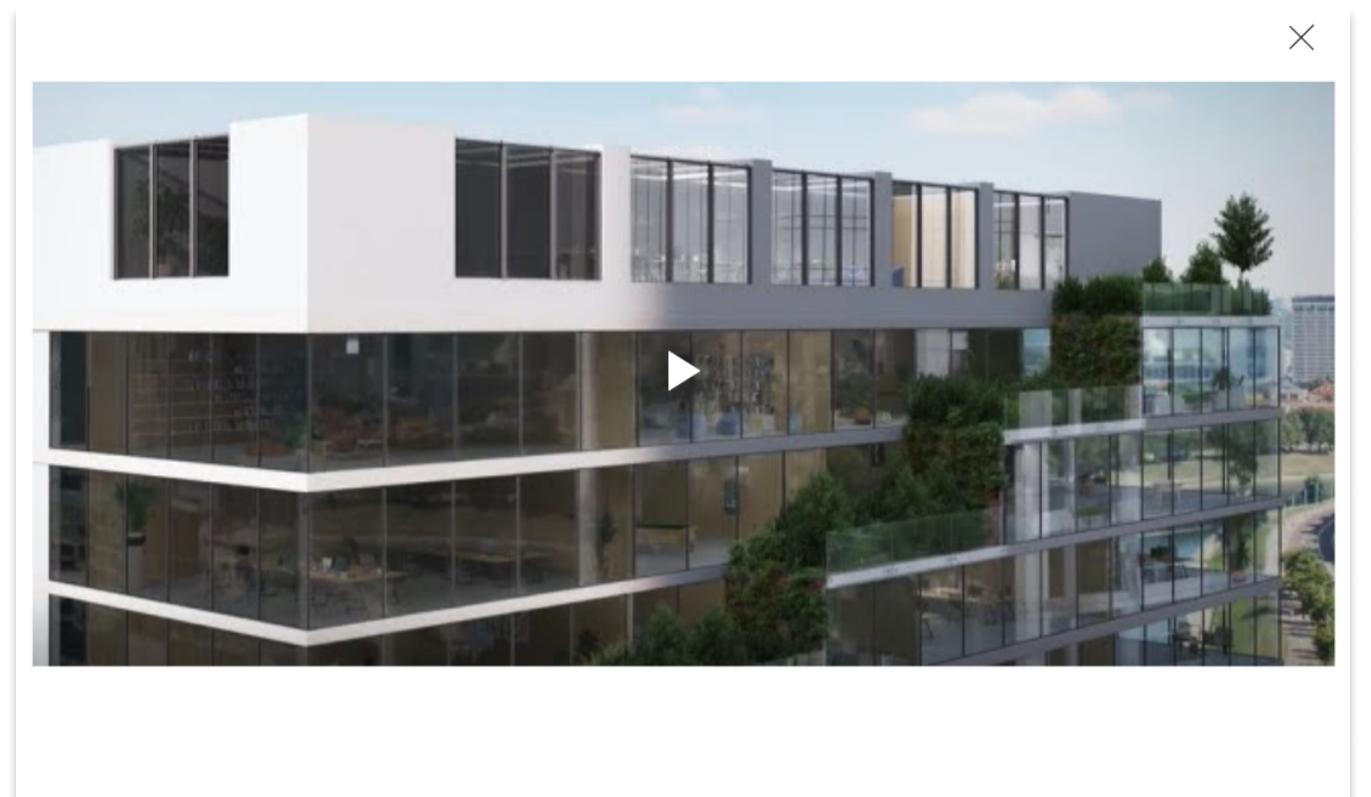

# #1\_5. COMMON STRUCTURE

**forwardRef, useImperativeHandle** Hook을 사용하여 하나의 레이아웃에  
부모 컴포넌트에서 핸들링 가능.  
props를 사용하여 페이지마다 다른 스타일 적용

```

const Popup = forwardRef((props, ref) => {
  const [open, setOpen] = useState(false);
  useImperativeHandle(ref, () => {
    return {
      open: () => setOpen(true),
      close: () => setOpen(false),
    };
  });
}
  
```

How streams become stories

Contrary to popular belief, Lorem Ipsum is not simply random text.

Where does it come from?

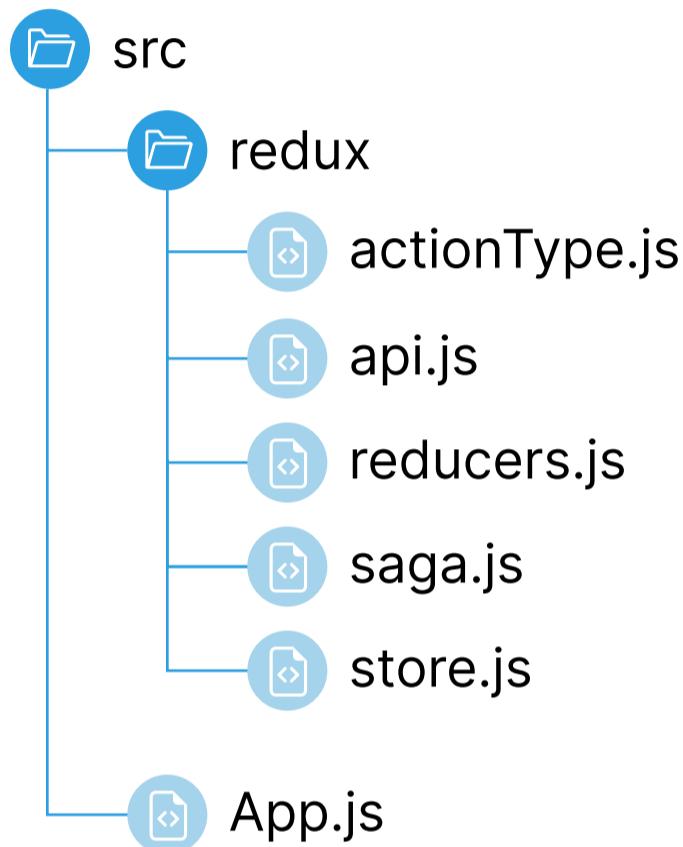

It is a long established fact that a reader will be distracted by the readable content of a page when looking at its layout. The point of using Lorem Ipsum is that it has a more-or-less normal distribution of letters, as opposed to using 'Content here, content here', making it look like readable English.

Contrary to popular belief, Lorem Ipsum is not simply random text. It has roots in a piece of classical Latin literature from 45 BC, making it over 2000 years old.

# #1\_4 STATE MANAGEMENT TOOLS

중복으로 사용되는 데이터를 redux와 redux-saga를 적용하여 데이터를 외부에서 관리

```

const Popup = forwardRef((props, ref) => {
  const [open, setOpen] = useState(false);
  useImperativeHandle(ref, () => {
    return {
      open: () => setOpen(true),
      close: () => setOpen(false),
    };
  });
}
  
```
